ACOUSTICOLOR® ACOUSTIC PANELS

Functional & Decorative

Combine form and function with AcoustiColor Acoustic Panels. With a variety of shapes, sizes, and colors to mix and match, there’s no limit to what you can create!

AcoustiColor Acoustic Panels were created with the idea that acoustics could make a visual impact in addition to making a room sound great. AcoustiColor Acoustic Panels are free to take form in a multitude of shapes and sizes, even tileable geometric shapes. Audimute offers a variety of modular acoustic tiles that you can create in any scale. Each modular panel acts as a part of a whole – allowing you to build your design and sound until you reach your desired results. The result: nearly seamless acoustic panels that can stand alone or nest adjacent to each other for large group installations.

Install acoustic panels in any space – from the home to the gym, office or restaurant. Audimute has the perfect acoustic panel for every space. Create bold floor to ceiling murals or intimate wall décor; coated in any color you want. With custom small and large size ordering, your design acoustics are truly fit for your space and application to match your décor and sound needs.
Modular Acoustics

Audimute AcoustiColor Acoustic Shapes combine aesthetics with acoustic performance. Audimute’s 3D wall shapes break up hard surfaces decoupling sound waves. AcoustiColor Acoustic Shapes are made with our eco-C-tex® absorption material. Create designer patterns with varying depths or flush designs. Shapes can be spaced apart or tightly fit together. Bring your wall art ideas to life by adding acoustic designer shapes to any space. These acoustic shapes are great for full application and our 1/2in 13# material is great for higher traffic areas.

ELEVATION: ACOUSTICOLOR ACOUSTIC SHAPES DIMENSIONS

More shapes available on Audimute.com. Custom shapes are available up on request.
Phrases, Sayings, Names and More

Audimute’s AcoustiColor Wall Art Letters are a completely customizable addition to your wall décor. Choose your letter, size, and color to create custom word wall art that blends naturally or stands out in your existing décor. We chose our fonts with these same customer needs in mind. Combining aesthetics with functionality, our custom word wall art letters look great while providing sound absorption in your space.

ELEVATION: ACOUSTICOLOR WALL ART LETTER SIZING
Font thickness per letter will always be greater than 0.5".

Branded Acoustic Treatment

Acoustic Designer Signs are an innovative approach to branding your business. With Acoustic Designer Signs, you are in complete control and the possibilities are endless. Your custom sign will be the perfect addition to the reception area, conference room, or any room where sound absorbing and branding are needed.

Acoustic Designer Signs are made from eco-C-tex® sound absorption material, a blend of recycled cotton and post-consumer newspaper. Combining aesthetics with functionality, wall signs have an NRC rating of .95, excellent for mid-to-high range frequency sound absorption. Installation is simple with our pre-installed panel clips, ideal for corporate or commercial offices, restaurants, and retail stores. Add a custom logo business sign to your office and stand out from the crowd.
Flexible Design Acoustics

AcoustiColor is our most flexible acoustic product allowing for custom shapes and colors combined with high acoustic performance. AcoustiColor products can be combined with common building materials to create hanging dividers, cubicle or partition walls or be used as is in full wall applications. AcoustiColor’s flexibility makes it a great product for spaces that need design or branding along with acoustic management.

Our TessaTiles product is displayed in the top right image. TessaTiles combine aesthetics with acoustic performance, creating unique acoustic panels for any space. Customize your TessaTile by choosing any Sherwin-Williams paint color. Below are the available pattern options.

ACOUSTICOLOR® ACOUSTIC PANELS: COATING OPTIONS

The possibilities are endless.
There are 1,000’s of color options to choose from Sherwin-Williams’ line of acoustical coatings. We can also match colors from other commercial paint manufacturers. With AcoustiColor Acoustic Panels you have the opportunity to match the décor of any space. Our coated acoustic panels are made from recycled cotton and paper products which gives a unique textured finish.

NOTE: Color matching cannot be guaranteed across shipments from different orders and variation may be more pronounced beyond the normal commercial range.
ACOUSTICOLOR® ACOUSTIC PANELS: COATING OPTIONS

Add exceptional sound absorption, superior aesthetics, and design flexibility that reflects your individual personality and style with AcoustiColor Acoustic Panels. AcoustiColor Acoustic Panels are lightweight and create a modern appearance combined with noise reduction and reverberation control. AcoustiColor Acoustic Panels are created using recycled materials, so natural variations in texture and shading can occur.

Hang Tabs Installation Instructions:

ACOUSTIC PANELS (Fabric, Image, & AcoustiColor®)
ACOUSTICOLOR SHAPES
TESSATILES

Hang tabs are made of durable plastic with an adhesive backing that adheres to the back of the panels, and is secured with two screws. The tabs are then used to mount panels to a wall using our Easy, Standard, or Stacked installation methods. Typically, two hang tabs are used per panel, however, larger panels may require more.

**Items needed:** Hang tabs with included screws, a level, a pencil, and a Phillips head screwdriver.

**Please note:** For the Standard & Stacked Hang Tabs installation methods, you will also need a measuring tape.
**Step 1:** Position a panel on the wall. Use a level on the top of the panel.

![Step 1 Image]

**Step 2:** Remove the level and lightly draw a line across the top of the panel with a pencil.

![Step 2 Image]
**Easy Method:**

**Step 3:** Screw the Walldog fasteners into the wall, just below the line. Make sure to leave a small 1/8" gap for the hang tab.

**Step 4:** Peel the wax backer off the hang tab, then place the tab over the screw on the wall with the sticky side facing out.
Easy Method Continued:

**Step 5:** Position the panel firmly into place on the wall and apply pressure to the locations of the hang tabs, so the hang tabs stick to the back of the panel.

**Step 6:** Remove the panel by lifting up and out from the keyholes on the tabs.
**Easy Method Continued:**

**Step 7:** Secure the hang tabs on the back of the panel with the small screws provided.

**Step 8:** Hang the panel on the wall, like you would a wall clock, sliding the keyholes over the screws and it will be positioned precisely where you want it.
Standard Method (measuring tape required):
Step 3 (see page 2 for steps 1 & 2): Peel the wax backer off the hang tabs, then place the hang tabs sticky side down on the back of the panel, and secure the tabs with the small screws provided.

Step 4: Measure the distance between the keyholes on the hang tabs and from the top of the keyholes to the top of the panel.
Standard Method Continued:
Step 5: Apply the same measurements taken in Step 4 to the wall, using the line created in Step 2 as a reference to the top of the panel. Mark the locations of where the keyholes will be on the wall with a pencil.

Step 6: Screw the Walldog fasteners into the wall, just below the line. Make sure to leave a small 1/8" gap for the hang tabs.
Standard Method Continued:

**Step 7:** Hang the panel on the wall, like you would a wall clock, sliding the keyholes over the screws.
Stacked Method (measuring tape required):
Step 3 (see page 2 for steps 1 & 2): Use Steps 1 & 2 for the first row only. For all panels except for the one(s) for the top row, peel the wax backer off the hang tabs, then place the hang tabs sticky side down on the back of the panel just above the top edge, and secure the tabs with the small screws provided.

For the panel(s) that will be used for the top row, install the hang tabs just below the top edge. Install the hang tabs with equal distances from the top edge of the panel(s).
Stacked Method Continued:

Step 4: Place the first panel for the bottom row on the wall, using the level line drawn in Step 2 as a reference to the top of the panel. Screw the Walldog fasteners into the wall through the top of the keyholes in the hang tabs.

Step 5 (optional): For additional panels before the top row, rest the panels on top of the lower row and repeat the instruction in the last sentence of Step 4.
Stacked Method Continued:

Step 6: For the panel(s) for the top row, measure the distance between the keyholes on the hang tabs and the distance from the bottom of the panel(s) to nearly the top of the keyholes on the tabs. Then, apply the same measurements to the wall and mark the locations of where the keyholes will be on the wall with a pencil.

Step 7: For the top panel(s), screw the Walldog fasteners into the wall and make sure to leave a small 1/8” gap for the hang tabs.
Stacked Method Continued:

**Step 8:** Hang the top row panel(s) on the wall, like you would a wall clock, sliding the keyholes over the screws.
Loctite® Power Grab® Express Heavy Duty Installation Instructions:

ACOUSTIC PANELS (Fabric, Image, & AcoustiColor®)
ACOUSTICOLOR SHAPES
AUDIMUTE STRATA®
ACOUSTIWOOD™
TESSATILES

Step 1: Apply 2” diameter dabs of adhesive on a panel, no more than 2' apart.

Step 2: Press firmly into place and you’re done!
Paslode® Brad Nailer Installation Instructions:
ACOUSTIWOOD™ ACOUSTIC WOOD ALTERNATIVE PLANKS
ACOUSTICOLOR® ACOUSTIC PANELS & SHAPES

Step 1: Attach the compatible foot to the brad nailer, then fasten panels in place with the brad nailer. Always use eye protection and follow Paslode’s instructions for use.

Optional Step: When installing AcoustiWood Planks, a retractable utility knife and a T-square can be used to cut the planks as needed for an exact fit.
If you want to remove or move the panels, simply pull them off the wall and use pliers to pull out any nails that are left in the wall.
Our founder Mitch Zlotnik loved his drums and respected his neighbors. So he invented a versatile sound absorption solution a musician could afford and a neighbor would love. Today our invention, eco-C-tex® is the key ingredient in a versatile suite of sound absorption and sound proofing solutions. Proudly made from 100% recycled materials, Audimute products are revolutionizing the way people experience work, worship, entertainment, and their home.
